

KEY FEATURES

- The ICON™ Casement Latch is designed to suit residential, architectural and Elevate™ commercial awning and casement windows.
- A grey nylon wedge is incorporated. This fastener incorporates square-edged and radiused styling in a bold aesthetic statement.
- Handle and cover manufactured from 316 grade stainless steel.
- The retention wedge is grey nylon and folds up to cam lever when opened. This is a significant feature in that there is no fixed keeper on the frame.
- Matching hinged door lever furniture.

MULTI-POINT LOCKING

ICON™ cam latch can be fitted to casement sashes. The latch is available left or right hand.

SMOOTH OPERATION

As the ICON™ lever is operated the nylon retention folds up and allows the sash to swing open.

HIDDEN FIXINGS

The ICON™ lever is secretly fixed to the sash.

HEAVY DUTY

We offer a range of heavy duty sashes that can be fabricated in large sizes and are supported on heavy duty four bar friction stays.
